Why Use SWS?

- 24-Hours a day, 365 days a year
- All the essential elements-timing, equipment, and personnel-brought to our clients
- Always prepared to absorb up-front demands that a large scale incident requires
- An understanding of the fundamental workings for projects of grand scale and complexity
- Locations throughout the southeast, midwest and gulf regions
- National response network offering a single source for emergency and disaster response services
- Proven Tier 1 national responder
- Responders have at minimum ICS, fire safety, confined space rescue, and rail transfer training
- Response manager training typically exceeds minimum requirements
- Self-performing, financially strong and stable
- Well established reputation in the emergency response arena

Our Approach

With nearly thirty years of experience in major Emergency Response events around the nation and world, from small fuel releases to major oil spills, minor traffic accidents to train derailments, biohazardous cleanup to biological threats, SWS Environmental Services has an innate, qualified understanding of the fundamental workings of projects from small and simple to grand in scale and complexity. SWS self-performs thousands of events annually, with strengths that include supervisory talent, equipment, systems, and the financial stability and working capital to support even the largest events.
